

MEASURING PROGRESS

Being able to measure is the basis for any scientific approach. We create courses tailored specifically for each individual student or a group of students (in the same level) and constantly measure and monitor the progress.

LEARNING METHOD

WE TAKE A SCIENTIFIC APPROACH IN LANGUAGE LEARNING

The 5 steps of VOX365EDU learning method

Let's use the example of a student who has purchased our most popular plan - **SILVER**

First - During the initial lesson we determine the student's level, in a relaxed conversation.

Second - The student is assigned to the right teacher.

Third - Right at the beginning of the course we conduct a formal speaking test with the student to accurately determine the weak points and the things we have to work on in the following 3 months.

Fourth - after the first 3 months we conduct another formal speaking test. Results are compared and based on those - the level of progress is established. After that we outline the important points we still have to work on with this particular student.

Fifth - At the end of the course we organise a Public Speaking session for each individual student. The student has to present in front of a group of students and teachers. After the public speech every student receives encouragement and constructive critic from the audience and the teacher.

SPEAKING TEST

100% effectiveness!

During the Formal Speaking test, we strictly focus on establishing the level of progress under the following FIVE criteria:

- Fluency**
- Coherence**
- Lexical resource**
- Grammatical range & accuracy**
- Pronunciation**

All speaking tests are recorded. The student and the teacher, both get a copy of the video recording. This video session helps teachers monitor the progress.

FLEXIBLE

We are famous for providing custom-made lessons that meet real students' needs, i.e. some students want to study (or work) abroad, some need to improve their English for their present job, while others just simply want to learn English as a hobby.

Students can choose teachers from their favourite country.

*Very important point of difference: After every 3 months of active study, we make a precise and clear outline for the direction we have to take in the following 3 months of study - for each individual student.
